

PORTFOLIO // PATRÍCIA HARSÁNY

## Re\_Object

---

Each element of the jewellery series is a mass-produced object. As jewellery, each element is given a new value..

## Wall of Allegories

---

The exhibition was created for Xarkis Festival during the Xarkis Residency in Cyprus where we reflected on the past of a micro-community in the historical Agros. Each object ensemble is a visualisation of a story using only locally found objects.

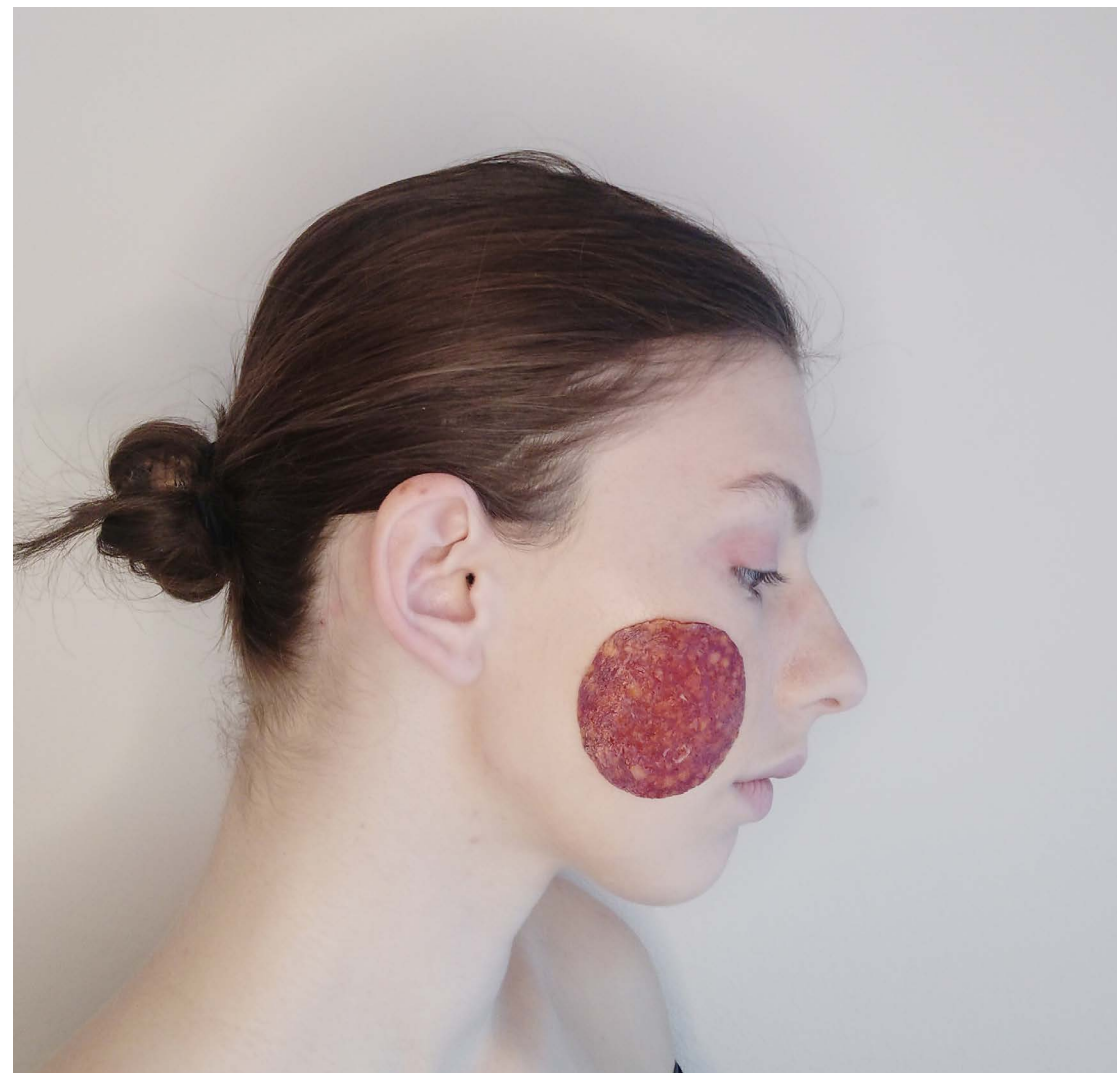

# Quarantine Jewellery

---

The “object diary” is a series that reflects on pandemic 2020, explores the relationship between body and object and the boundaries of jewellery.

# Wearable Surroundings

---

The online residency project is a live performance projected via Zoom, in which unusual materials are placed on the body and then transformed and disappear.

## Lost and Found

---

During the performance, rusty, worn out, worthless materials are transformed into performative objects and then appear on a stage.
